Equipment Setup

LIGHTING

Professional interactive lighting system matched to the look and feel of the venue. Multi colored lightings system will change and move in beat with the music.

SPEAKERS PAIR

Professional 200-350watt self amplified speaker. Each speaker has its own amplifier and power source which provides increased reliability. Capable of supplying crowd of up to 250 guests.

COLORED SPOTS

These colored spots provide coloring to areas of the dance-floor or function room. The spots are especially effective in coloring sections of the venue around the Dj and dance-floor (see picture). Being a "Soft" lighting effect this type of light is often more effective and non-interfering during such times as speeches or bridal waltz dances.

DJ CONSOLE

The Dj console is made up of professional twin CD players, a sound mixer, headphones, and a microphone.

The Dj console is the area from which the entire sound and lighting system is controlled. For this reason, Party Music uses modern, proven, and reliable brands of equipment.
